

# Guido Vizoso

Product Engineer & Frontend Team Lead — <https://gvizo.so>

I'm a product engineer from Buenos Aires, Argentina with ~10 years of experience. Currently making the world a safer place by preventing money laundering at Sandbar.

2025 — Today

## Founding Product Engineer at Sandbar

- Led the entire customer facing side of an AML & compliance screening SaaS product from day one.
- Created a new project from scratch with complete feature parity with the existing product. From initial commit to first migrated customer in 122 days.
- Reduced compliance analyst per-customer investigation from 8 minutes to 90 seconds.

Tech stack: Typescript, Vite, React, Tanstack (Query, Table, Router), Python, FastAPI, Postgres, AWS.

2022 — 2025

## Lead Frontend Engineer at Antartida

- Led a diverse frontend & design team from all backgrounds and skill levels.
- Worked on a variety of projects ranging from financial products to real-time 3D experiences.
- Set up a bootstrap project to ship products in ~3 weeks.

Tech stack: Typescript, React, Next.js, Tanstack (Query, Table), react-native, Nestjs, react-three-fiber, Zustand.

2021 — 2022

## Software Engineer at Kittl

- Contributed to a graphic design tool built entirely using browser technologies.
- Worked on adding custom text effects to the editor while preserving client performance.
- Added custom components and rich text support to in-house CMS to allow the marketing team to ship landing pages twice as fast.

Tech stack: Javascript, Typescript, React, HTML canvas, fabric-js, Next.js, Express.

2020 — 2021

## Senior Frontend Engineer at JP Morgan Chase & Co

- Led frontend development of a new platform for in-house IoT device management.
- Mentored junior engineers from the first job in tech program.

Tech stack: Javascript, React, Redux, react-flow.

2018 — 2020

## Senior Frontend Engineer at Supervielle Bank

- Led frontend development of the company's new website and several speedboat initiatives including wearables support and AI chatbots.
- Integrated a headless CMS (IBM Watson Content Hub) to allow the marketing team to ship dynamic landing pages.
- Reused existing infrastructure to allow non-clients to perform transactional operations (FX, fixed-term deposits).

Tech stack: Javascript, React, Next.js, IBM Cloud, react-native.

2016 — 2018

## Web Developer at Uasabi Digital Agency

- Agency web developer building email newsletters, marketing websites and e-commerce stores.

Tech stack: HTML, CSS, Javascript, React, Vue, Wordpress, Magento.
